VOC CONTROL DEVICES/ SCRUBBERS

Course #284

VOC control devices of many types and sizes are used in a wide range of industries, from paint shops to oil refineries. This course will cover the main categories: adsorbers, absorbers, condensers, oxidizers. A discussion of scrubbers for particulate control is also featured. Principles of operation, applications, and compliance inspection procedures and safety will be presented for each type of device.

November 8, 2005

8:30 AM - 5:00 PM

South Coast Air Quality Management District

21865 E Copley Drive

Diamond Bar, CA 91765-4182

(909) 396-2000

Students will participate in a "mock inspection" at a local facility, using equipment and techniques discussed in the classroom. The field inspection and an exam are required to obtain a certificate of completion. **Safety glasses & Ear Protection are required.** Enrollment fee may apply.
